Dear Hiring Team,

I am excited to apply for the **IT Support Specialist** position in your Helsinki office. With a background in computer science and **hands-on experience working in Aalto University's IT department**, I am confident I can provide reliable and proactive support for both end users and office infrastructure.

In my role at Aalto IT, I developed and maintained a course system, built dashboards and backend services, and provided support for users. This included solving **network configuration issues** and ensuring smooth operation of course IT systems. I am comfortable working across **macOS, Windows, and Linux** environments.

I enjoy solving problems and explaining technical solutions clearly to people with different levels of technical background. My **patient and service-oriented approach** have helped me build trust with users while keeping systems running smoothly. I am also eager to grow further by supporting AV systems, meeting room setups, and office network infrastructure.

I would be very happy to bring both my technical skills and proactive attitude to support your teams. Thank you for considering my application, and I look forward to the opportunity to discuss how I can contribute.

Best regards,
Jinda Li
