Dear Housemarque Team,

I am excited to apply for the **IT Specialist** position at Housemarque. At this early stage of my career, I want to combine my technical background with my passion for games and support the development of world-class projects such as *Returnal*. I admire Housemarque's focus on gameplay and technical excellence, and I am eager to contribute to your next journey as part of the IT team.

I hold a computer science background and have solid experience working with Linux systems in both development and maintenance. During my time **at Aalto University, I worked directly in the computers science IT department**, where my responsibilities included full stack development for a master's course system. This role gave me valuable experience in **working within an IT team, understanding departmental workflows, and providing practical technical solutions** that supported both staff and students.

Beyond my IT skills, I am also a game developer myself. **I know how important smooth IT operations are for teams to stay focused on creating games.** I am looking for a breakthrough in my career, and I am confident that I can bring not only my skills but also my strongest enthusiasm to Housemarque. Supporting your teams and contributing to the success of your games would be a privilege.

Thank you for considering my application. I would be very happy to discuss how I can support Housemarque with both my technical abilities and my passion for games.

Best regards,
Jinda Li
