Dear Small Giant Games Team,

I am excited to apply for the QA Specialist position at Small Giant Games. I have over four years of experience in game development using Unity and Unreal Engine and have worked on several projects building gameplay systems, physics, and optimizing performance. These experiences helped me understand the challenges developers face and the importance of QA in making games smooth and enjoyable for players.

During my time at **NetEase**, I gained insight into **QA processes for large-scale games** and saw how structured testing ensures smooth experiences for players. In my previous experience at **Microsoft**, I also developed a **user study framework** for a project, applying a player-centered approach. These experiences taught me the importance of attention to detail, organization, and keeping the player in mind throughout development.

I am proactive, responsible, and work well with developers, designers, and artists. I am interested in contributing to test automation, release planning, and improving QA workflows at Small Giant Games. I enjoy exploring new ways to ensure high-quality gameplay and supporting teams in delivering polished games.

Thank you for your time and consideration. I would be happy to discuss how I can help deliver engaging, high-quality mobile games for your team.

Best regards

Jinda Li
