Dear TeamViewer Hiring Team,

I am writing to apply for the **Developer C++ 3D position** at TeamViewer in Munich. **My name is Jinda Li, and I have over four years of experience developing 3D software.** You can view my full experience and projects on my [LinkedIn profile](#). **I have hands-on experience in 3D rendering, AI, graphics, visualization, VR/AR applications.**

Relevant experience includes:

◆ **Microsoft – Unity Developer**

Developed cross-platform VR applications and custom in-editor tools in C#. Focused on performance optimization for complex scenes and shaders to enhance visuals while maintaining smooth rendering on target devices.

◆ **Microfeel (AI Startup) – Unreal Developer**

Extended Unreal Engine with C++ and Python scripting to implement AI-driven systems and procedural generation for dynamic 3D environments. Focused on modular, scalable, and multithreaded system architecture.

◆ **Independent Project – A Cloud's Adventure**

Led development of a physics-based, controllable cloud character in Unreal Engine using C++ and Blueprints. Designed custom collision and interaction systems, and optimized performance for smooth 3D simulation.

I have strong expertise in C++ (including C++11/14), 3D frameworks, physics simulation, VR/AR application development, Git version control, and multi-threaded programming. I am eager to learn new technologies and contribute to building reliable, high-performance 3D software.

Thank you for considering my application. I look forward to the opportunity to discuss how my skills can support TeamViewer's 3D development initiatives.

Best regards,
Jinda Li
