PROJECT EXPERIENCE

A Cloud's Adventure

Ongoing game project, based on my master's thesis project at Aalto University

- Simulated an interactive cloud with mixed graphics tech in Unreal Engine, including **particle simulation, position-based dynamics and custom shading**.
- Designing core game mechanics, small-scale open world and exploration experiences.

Computer Graphics Samples

Check images and details [Here](#)

- Extended Nvidia Framework to realize **Global Illumination**. The radiosity method is adopted and the Quasi Monte Carlo Sampling with Halton sequence is implemented.
- **Raytracing Ambient Occlusion** is implemented together with Bounding Volume Hierarchy and Surface Area Heuristic.

WORK EXPERIENCE

Unity Developer

Mixed Reality, Microsoft

Research projects to deliver state-of-the-art products

Feb. 2024 - Mar. 2025

- Cross-platform VR Tools: Developed Unity-based **AR-in-VR simulator for research**, integrating holographic rendering, eye-tracking, night vision, etc.
- HoloLens2 Applications: Engineered **AR applications** with gesture-based interactions.

AI Game Developer

AI-Driven Open World Engine, Microfeel

Start-up company focusing on Generative AI and UGC in Games

Sep. 2023 - Apr. 2024

- Implemented AI procedural building generation using LLMs in Unreal.
- Pioneered **3D Gaussian Splatting rendering** in Unity for real-time photorealistic scene reconstruction.

SKILLS

Unity

Unreal

C++/C#

HLSL

Shader

VR/AR

React

Python

Parallel Programming

Git

Blender

JS

JavaScript

Linux

EDUCATION

Game Design and Production, Aalto University
Master of Science 2021 - 2025

Electrical Engineering, Southeast University (China)
Bachelor of Engineering 2016-2020
