Dear Wisemen Hiring Team,

I am writing to apply for the **Game Developer** position. **My name is Jinda Li, and I have over four years of experience developing games in both Unity and Unreal Engine.** You can view my full experience and projects on my [LinkedIn profile](#). **I have hands-on experience in gameplay systems, AI, graphics, UI integration, client-server communication, and performance optimization, especially on mobile platforms.**

My experience includes:

- **Microsoft – Unity Developer**

Built cross-platform VR applications, improved Android performance, and created custom in-editor tools in C# to speed up content preparation. Developed shaders to enhance visuals and optimize rendering.

- **Microfeel (AI Startup) – Unreal Developer**

Extended Unreal Engine with Python scripting to add AI features, and built procedural generation systems for dynamic buildings. Focused on modular and scalable system architecture.

- **Independent Project – A Cloud's Adventure**

Leading development of a physics-based controllable cloud character in Unreal Engine using C++, Blueprints, and HLSL. Designed and implemented custom collision handling and interaction systems for a particle-based cloud avatar, similar in complexity to vehicle physics. Optimized performance from 2 FPS to smooth gameplay on a laptop GPU by using a neighbor grid system and other techniques.

- **NetEase Games – Game Designer Intern**

Contributed to combat design, streamlined animation pipelines, optimized movement in complex combat environments, and helped design initial battle maps during the open-beta stage of the highly successful title *Naraka: Bladepoint*.

Although I haven't recently launched a public project, my extensive experience in both academic and professional settings has fully prepared me to write clean, maintainable, and production-ready code as part of a team. **I would be more than happy to complete a coding task to demonstrate my abilities in practice.**

Thank you for your time and consideration.

Best regards,

Jinda Li
